14 March 2025

To: Designers of Advanced Metering Infrastructure (AMI) Outstation Submissions

Dear Sirs/Madams

**Revised WSD Standard Specification E-89-01 and  
Reference Design Drawings for  
Advanced Metering Infrastructure Outstations**

This letter announces the revision of WSD Standard Specification E-89-01 and the reference design drawings for Advanced Metering Infrastructure (AMI) outstations for wired smart water meters (formerly Automatic Meter Reading (AMR) outstations). The updated specification and drawings are available for download on the Water Supplies Department's official website: <https://www.wsd.gov.hk/en/plumbing-engineering/index.html>.

Effective 17 March 2025, applications for water supplies that adopt the reference designs and revised standard specification for AMI outstations will no longer require detailed vetting by WSD. This change will significantly reduce approval times. The use of reference designs is optional, and applicants with existing AMI proposals may submit revised proposals to the Water Authority for expedited approval if they choose to adopt them.

For any inquiries, please contact Mr. H.K. Yeung (TM/TD(2)) at 3565 5418 during office hours.

Yours faithfully,

(LAW Yiu Yip, Charles)
