

Report on the water quality of Tai Shui Hang on 30th December 2008

Prepared by F.4 students of Pentecostal Lam Hon Kwong School

Date: 30 th December	12:00	12:15pm	12:30	12:45	13:00
Location of Tai Shui Hang:	Footbridge near Tai Shui Hang Village	Footbridge near Tai Shui Hang Village	Footbridge near Tai Shui Hang Village	River bank near the Lavatory	River bank near the Lavatory
Dissolved Oxygen Do:	4ppm	4ppm	4ppm	4ppm	4ppm
pH:	7	7	7	7	7
Temperature:	15°C	15°C	16°C	15°C	16°C
Turbidity:	40JTU	40JTU	40JTU	40JTU	40JTU
Air Temperature	17°C	17°C	17°C	17°C	17°C
Remark	Clear	Clear	Clear	Clear	Clear

I think the activity is good to let us know more about the water monitoring of Hong Kong. Through this activity, I know that at different position of the same river, they can have different pH values. It is fun! Also, we do know the importance of conserving the water resources & some environmental problems caused by water pollution. From now on, I will try to conserve the resources of the earth. (By: F.4D Lau Tsz Yu)

I felt that this activity is meaningful and interesting. It makes me know more about the water. Before attending this activity, I didn't know there is "monitoring" for water in Hong Kong but after this, I know that and even learn a bit on the geographical location of some rivers in Hong Kong. Moreover, having a chance to do the experiment makes me feel happy! (By: F.4A Lau Tsz Ka)

這次測試水質的活動令我們學到了很多測試水質的方法，而且在這次活動中，亦令我們知道日常生活中應要節約用水。而在這次活動的地方亦讓我們看到一些特別的地理環境。(By: F.4D Choi Lok Tung)
